Education

Indian Institute Of Information Technology Allahabad

Master of Technology in Software Engineering, CGPA: 8.18

Allahabad, Uttar Pradesh, India

August 2023 - June 2025

Rustamji Institute of Technology

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.43

Gwalior, Madhya Pradesh, India

July 2019 - June 2023

Experience

BCG GenAI - AI Engineer Intern

Sep 2025

- Developed an AI-powered financial chatbot prototype by integrating 10-K and 10-Q reports with rule-based logic to provide clear and data-driven financial insights.
- Applied Python, pandas, and basic NLP techniques to extract, clean, and analyze key financial metrics, enabling automated trend identification and reporting.
- Gained hands-on exposure to GenAI workflows and foundational LLMOps practices while preparing structured financial data for scalable AI-driven analysis.

Projects

AI Travel Planner - Agentic Multi-Agent System | Link

Oct 2025

- Engineered agentic AI system using LangGraph with ReAct pattern and state machine architecture, enabling autonomous multi-agent orchestration through conditional routing and dynamic tool selection for intelligent travel planning.
- Integrated 4+ real-time APIs via LLM function calling, built production-ready full-stack solution with FastAPI backend and Streamlit frontend, implementing modular architecture with comprehensive error handling.
- **Tools:** Python, LangGraph, LangChain, FastAPI, Streamlit, Groq/OpenAI APIs, REST APIs

BlogStack - Scalable Blogging Backend API | Link

Jan 2026 - Feb 2026

- Designed and developed a modular and scalable RESTful backend architecture using FastAPI and PostgreSQL, enabling secure user authentication and high-performance CRUD operations for blogging workflows.
- Implemented JWT-based access control, ORM-driven database modeling with SQLAlchemy, schema validation with Pydantic, and migration management using Alembic to ensure maintainable and production-ready backend services.
- **Tech Stack:** Python, FastAPI, PostgreSQL, SQLAlchemy, Alembic

Cold Email Generator for Service Based Company | Link

Dec 2024 - Jan 2025

- Engineered an LLM-powered automation system to extract structured job data from career portals and generate personalized outreach content using LangChain workflows and vector databases.
- Integrated API-driven AI services with scalable text processing pipelines to enable context-aware email generation while handling latency and request constraints.
- **Technologies Used:** Python, Streamlit, Groq AI, LangChain, ChromaDB.

Technical Skills

AI/ML & Libraries: LangGraph, LangChain, LangSmith, Weights & Biases, Hugging Face, OpenAI API, Google Gemini API, LLaMA, TensorFlow, Scikit-learn, Pandas, NumPy, FAISS, ChromaDB,

Programming Languages: Python, JavaScript, SQL, Java

Databases: PostgreSQL, MySQL, Firebase

Tools & Platforms: Git, GitHub, Postman, Docker, VS Code, Jupyter Notebook, Google Colab

Achievements

- Cleared GATE 2023 with 90 percentile.
- Solved over 500 programming problems in Java and Python on **LeetCode**, **Coding Ninjas**, **GeeksforGeeks**, and other coding platforms.
- Earned **ChatGPT Prompt Engineering** certificate covering effective prompting, text summarization & transformation, and LLM-based inference & expansion.
- Achieved **Google Cloud** badges (Security, Data, Essentials) and completed **AWS Academy Cloud Foundations** with proficiency in AWS Architecture & Core Services.
